Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 43-45 and 48, drawn to an apparatus (or method - Applicant's amendment to claim 43 to now recites a "pharmaceutical screen" is not clear if Applicants are claiming an apparatus or a screening method), classified in class 435, subclass 288.7.
 - II. Claim 47, drawn to an apparatus (or method - Applicant's amendment to claim 47 to now recites a "pharmaceutical screen" is not clear if Applicants are claiming an apparatus or a screening method), classified in class 422, subclass 82.11.
 - III. Claim 46, drawn to a method for screening pharmacological agents, classified in class 435, subclass 7.23.
 - IV. Claim 49, drawn to a method for screening pharmacological agents, classified in class 435, subclass 7.23.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions III and I (or II) are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice

Art Unit: 1641

another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be use to practice another and materially different process such as the method of Group IV.

3. Inventions IV and I (or II) are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as the method of Group III.

4. Inventions III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together because the methods in each group use different reagents and thus have different modes of operation. The method of Group IV does not use a molecular tag as in the method of Group III.

5. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different

Art Unit: 1641

functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together because the device (or method) of Group I uses molecules of a first type and second type on the sensor surface whereas the device (or method) of Group II only uses a molecule of a first type on the sensor surface so the inventions of Groups I and II are capable of use together and have different modes of operation.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-IV, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
